

WATER SAMPLING INSTRUCTIONS:

1. Avoid running any water for at least **6 hours**, including flushing toilets, etc. This can be overnight, during the work day, etc.
2. Write the address, date, and time at the bottom of this sheet.
3. Using the kitchen tap, fill the numbered bottles in numerical order with cold water, without turning off the tap if possible. Screw the lids on tight. Place the filled bottles back in the box.
4. Call MSK Engineers at 802-231-3277 and provide your address and telephone number to let us know the kit is ready.
5. Place this sheet in the box with the filled bottles. Place the filled kit on the front step or somewhere visible from the road. We will return to pick it up.

We are happy to send an inspector to assist with collecting samples, moving the filled sample kit, or any other part of this process. If this would be helpful, or if you have any questions, please contact:

MSK Engineers
